

Help LGHS Robotics get to the FRC World Championship!

On March 31st, Team 972: Iron Claw, made up of Los Gatos High School students, became Finalists at the FIRST Robotics Competition (FRC) event in San Jose. Our team is proud that we have improved enough in four years since our restart to succeed in a competition against 60 world-class teams.

We now qualify for the **FRC World Championship in Houston April 17-20!**

The problem: Champs is *extremely expensive*.

Approximated Total Cost: \$26,400

- \$5,000 alone to register
- Student flights
- Houston lodging
- Competition meals

By supporting our team, you are enabling as many of our members to have the opportunity to be a part of this inspiring experience.
